

Fusion Fertigator

Manual or Automated Fertilizer Injection

“ The difference this makes in our day-to-day work is amazing... ”

“ We were really surprised how simple it was to customize for our needs... ”

“ The increased level of control makes us much more efficient... ”

Fusion Fertigator makes applying fertilizer safe and easy for the end user while providing multiple control options.

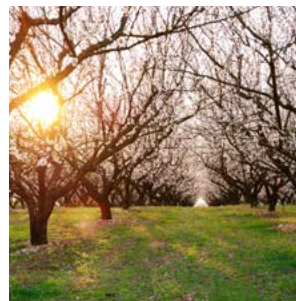

With the Fusion Fertigator's unique design fertilizers are diluted and in solution by the time they are introduced into the main irrigation water flow, allowing simultaneous injection of fertilizers.

Features

- 1 to 6 injectors
- Injection rates: 5 - 1200 gph per injector
- Precise injection control
- Modular design for easy maintenance
- Easily upgradable from manual to auto
- Inject multiple fertilizers individually or simultaneously
- Compatible with high irrigation pressures

Benefits

- Multiple built-in safeguards
- Efficient fertilizer injection will reduce labor time and cost
- Mitigates over feeding, waste, run-off
- Customized dosing available
- Adjustable application rate – consistently “spoon feed” or apply heavily as needed
- Fertilizers are never under pressure for safety

Make every drop matter
Sustainability through efficiency
